

ZEISS Single Vision SmartLife Young PRO Lens

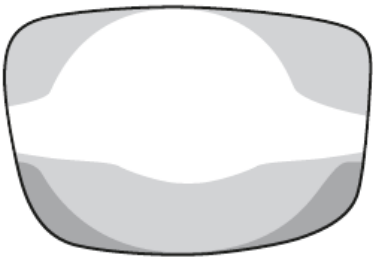

ZEISS Single Vision SmartLife Young PRO Lens

Perfect for young people’s connected and active lifestyle and changing anatomy.

ZEISS Single Vision SmartLife Young PRO lens are ideal for the changing needs of children as they grow from kids to teenagers. Kids and teenagers have very different vision needs compared to adults. They differ in age-specific facial anatomy and morphology resulting in changing parameters of wear to consider in the lens design.

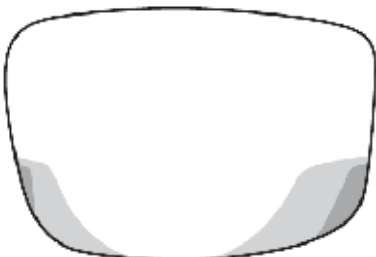

ZEISS Single Vision SmartLife Young PRO added benefit of a more comprehensive examination with the i.Profiler^{PLUS}. The Individual Luminance Design Technology incorporates the individually measured pupil diameter into the lens design - for more precise lenses, closer to the child’s requirements.
