

ZEISS Single Vision ClearMind lenses

ZEISS Single Vision ClearMind lenses provide extremely clear vision with reduced peripheral blur towards the edges compared to ZEISS standard lenses.

Large zone of clear vision

Optimized for
temporary
blur perception

Low and optimized peripheral blur towards the edges

Up to **48%**
larger zones of
clear vision with
no visible blur
than a ZEISS
standard Single
Vision lenses.¹

Consumer benefits

- Extremely clear vision all day long.
- Vitalized eyes for all-day comfort.
- Reduced mental effort.

ZEISS Single Vision ClearMind Lenses

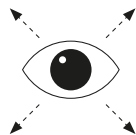

See Clearly. Think Clearly.

Extremely clear vision.
Designed to reduce the cognitive load.

ZEISS Single Vision ClearMind lenses are engineered to expand the effective visual field compared to conventional ZEISS single vision lenses by minimizing peripheral blur. This lens design incorporates innovative **ZEISS NeuroOptix technology**, utilizing advanced design intelligence with integrated neuroscience principles. This enhances visual processing efficiency, reducing the cognitive load through uninterrupted visual clarity.

ZEISS standard single vision lenses

ZEISS **Single Vision ClearMind** lenses

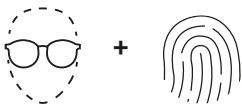

Up to **48%**
larger zones of clear vision with
no visible blur than ZEISS standard
single vision lenses.¹

75% of wearers confirm
that it feels easier for them to stay
focused with these lenses.²

By the way
Vision zones schematically
illustrated here are less
perceptible in reality.

ZEISS Single Vision ClearMind lenses come in 2 tiers:
Superb and Individual 3.
Individual 3 tier considers individual anatomy and special vision needs
to get the most out of the customized lens design for any patient.
