

ZEISS SmartLife PRO Single Vision Lenses

ZEISS SmartLife PRO Single Vision Lens Portfolio

The next generation of ZEISS Single Vision Lenses with improved optical performance up to 88% larger clear fields of view.

Today's Single Vision lenses

Today's single vision lenses are mostly optimized for one distance only -mainly for far vision. The result: The lower part of the lenses is not optimized for close distances.

ZEISS SmartLife PRO Single Vision Lenses

ZEISS SmartLife Single Vision Lenses are optimized for sharp vision in all distances. Especially when lowering the gaze while focusing on near objects. This optimization results in an improved optical performance up to 88% larger clear fields of view.¹

Consumer benefits

- 94% perceived wide fields of comfortable vision for intermediate and near tasks.
- 88% experienced relaxed vision at all distances.
- 94% experienced ease of viewing in all directions.
- 9 out of 10 rated the quality of vision with ZEISS SmartLife lenses positive.
